

S400 LINE PRODUCT BOOK

For a hundred years, INAX has created aesthetic ceramic tiles and bathroom products with one unwavering passion: to enable people to live well.

With an unmatched mastery in understanding the properties of clay and harnessing the power of water, we continue our pursuit of craftsmanship, maximizing the blessings of nature.

Building on our heritage in ceramics, we offer intricate tiles in various forms and hues that add a touch of warmth to the cityscape and products that enable cleanliness and comfort and fit esthetically within the bathroom space.

INAX reimagines the entire bathroom experience, creating a calming environment that embodies Japanese rituals of water - navigating you to a deeper level of relaxation and rejuvenation.

Take a moment to reflect in serenity. Achieve harmony of your body and mind. Embrace your true self and be energized for what lies ahead tomorrow.

LIVE WELL

INAX 100 YEARS
ENABLING EVERYONE TO LIVE WELL

RECHARGE IN YOUR REFLECTION SPACE

Japanese architectural practices have created spaces of unparalleled beauty through the masterful use of the light and shadows.

Mystical rays of light penetrate through small windows, forming different shades and shadows on the floor, walls, and products.

This creates a sense of serenity, of utter relaxation -an unembellished yet thoroughly elegant space. Only by carefully designing the

use of light can the combination of architecture and products, from tiles to toilets, create such an atmosphere. The S400 LINE by INAX introduces this feature to your bathroom space allowing you to recharge and spend a moment of reflection.

S400 LINE DESIGN VALUES

The S400 LINE has been developed based on the INAX Brand Design Values. Essence pursues the essential values of the product. Sophistication ensures functionality as well as attractiveness when integrated with architecture.

And thoughtfulness enables a considered design that reflects the Japanese sensibility of being caring to others. Through these three perspectives, INAX offers a design value which is uniquely different from typical designs.

ESSENCE
The side of the product facing the user and areas where the user may touch is shaped with an approachable, soft curve—the “human line”—while the straight “architecture line” is used on the side that faces the wall to fit well with the architecture.

SOPHISTICATION
Adopting a straight line for the side facing the architecture eliminates unnecessary gaps, making the area look spacious.

THOUGHTFULNESS
The functions are designed to allow for intuitive use.

INAX SIGNATURE ELEMENTS

INAX signature elements illustrate the philosophies and values underlying the brand, nurtured over the years in Japan. Being INAX’s design DNA, they ensure that all INAX products have a consistent look.

SQUOVAL

A hybrid shape created from a square and an oval, which INAX has aptly named a “Squoval.” This unique hybrid geometry celebrates the friendly and human shape of the oval with the structure and architectural relevance of the square. The combination of human and architectural elements (humanitecture) helps to create a form which is both conscious of the architectural space in which it will be placed and demonstrates a sensitivity toward human interaction, connecting people and architecture.

TENSION

Inspired by the surface tension of water, this element gently reflects light and invites interaction. This detail adds a controlled yet dynamic element to an otherwise flat surface. Like the edge of a samurai’s sword, it is precise, elegant, and beautiful. The form has an embedded function and acts as a guard to water; its symmetrical incline gently repels liquid.

VOLCANO

Flowing from one surface to the next, the volcano is a controlled organic transition, inviting interaction and intuitively guiding the user to a point of importance. The volcano is easy to clean and maintain and is robust yet elegant.

ONE-PIECE TOILET

The attractive S400 LINE one-piece toilet enhances the quality of your everyday life by being easy to clean and making your bathroom feel spacious.

Maximizing the "human line" curve of the squoval and the straight "architecture line," the S400 LINE one-piece toilet has a modern look, giving a welcoming feel to the user while integrating well with the surrounding architecture. The low silhouette design, which makes it look like a tankless toilet, and its skirted base, which dips in at the bottom, help create a spacious

feeling in the bathroom. The water-saving dual flush buttons indicate the INAX Blue color when flushing, showing which function is in use and giving a hygienic impression, and the silver finishing surrounding the buttons generates a premium look and feel. The toilet is made with INAX's proprietary AQUA CERAMIC technology, which prevents the attachment of waste and the buildup

of black water marks. The toilet will retain its shine with simple daily cleaning, allowing you to spend more time on things that you enjoy.

CLOSE COUPLED TOILET

The S400 LINE close coupled toilet, with its stylish modern design, will liberate you from the burden of cleaning, helping you to live well.

Celebrating the combination of the curved "human line" and the straight "architecture line" of the design concept, the S400 LINE close coupled toilet has a stylish modern look that fits well with the architecture. The skirted base dips in at the bottom, making the bathroom look spacious, and the form of the lid of the tank makes it easy to clean. The water-saving dual flush buttons

are carefully designed so that the INAX Blue color appears when flushing, enabling intuitive use and giving a hygienic impression. The silver logo plate together with the silver finishing surrounding the flush buttons generates a premium look and feel. The S400 LINE close coupled toilet is made with INAX's proprietary AQUA CERAMIC technology, which prevents the

attachment of waste and the buildup of black water marks. As the toilet bowl is rimless, it will only require a quick sweep inside the bowl to keep the toilet shiny, thereby liberating you from the burden of daily toilet cleaning.

MANUAL BIDET

With easy-to-understand icons designed for intuitive use, the user-friendly S400 LINE manual bidet offers added comfort and hygiene.

The S400 LINE manual bidet has easy-to-understand icons on the lever for you to enjoy intuitive use. With its thoughtful design, you will be able to connect the hose easily with the body in one action. The manual bidet features INAX's proprietary dual nozzle dedicated to the bidet function for ladies, in addition to the standard rear wash nozzle.

The dual nozzle caters to the concerns of many women about washing their intimate areas with the same nozzle as that for the rear wash and is designed to offer a softer shower wash, made possible by spraying water mixed with air from multiple holes.

VESSEL BASIN & MIXER

The modern design of the S400 LINE vessel basin is a stylish and easy-to-maintain solution, even for smaller bathrooms.

The S400 LINE vessel basin offers a stylish sense of modern simplicity and functionality even in smaller bathrooms. It maximizes its design with the squoval "human line" curve in the front, creating rounded corners that add to safety in smaller bathrooms, and the straight "architecture line", which makes the product integrate well with the architecture when placed

against the wall. The vessel basin is also functionally designed with space to place items such as a soap dispenser.

The same S400 LINE design concept that adopts the human and architecture lines also appears in the details of the basin mixer. Furthermore, the volcano curve beneath the handle gives you a

better grip and a pleasant user experience. The S400 LINE vessel basin is easy to clean and maintain, as it is made with INAX's proprietary AQUA CERAMIC technology, which prevents dirt from attaching to the surface.

EXPOSED SHOWER SYSTEM

The S400 LINE exposed shower system ensures a comfortable shower experience, regardless of the water pressure available in your region.

The S400 LINE exposed shower system comes with a large squoval overhead shower, which provides a full-body showering experience and a hand shower. A thoughtful and functional. Japanese design that maximizes space utilization even in smaller bathrooms, the S400 LINE exposed shower system combines a tray with the faucet, which serves as a shelf for you to place shampoo

and other critical items you need to enjoy your shower. An intelligent pressure booster is built-in within the hand shower, ensuring that you enjoy a comfortable shower even when the water pressure is low. As well, the showerhead is extremely easy to clean.

TILE MODULE ACCESSORIES

S-LINE's Tile Module Accessories enable a stylish Japanese grid-based spatial design, bringing harmony to your bathroom. Functional while fitting in naturally with the surrounding, they are sure to add comfort to your everyday life.

A perfect match to tiled walls, the S-LINE Tile Module Accessories are designed to keep your bathroom stylish and functional, with the shelves, towel hangers, and other pieces all structured to be mounted on tile joint intersections. The 300mm-module is based on Shaku, the traditional dimensional unit used in Japanese architecture, linked to the measurement of the Japanese body. Shaku unites the spatial balance of the architecture, fixtures, and human scale.

Inspired by the grid patterns found in traditional Japanese architecture, such as shoji screens and tatami mats, the S-LINE Tile Module Accessories help create a spatial design with distinct Japanese taste. Enjoy the comfort of a fully coordinated bathroom and the feeling of being at a Japanese Onsen, with accessories featuring the INAX Signature Elements.

S400 LINE PRODUCT OVERVIEW

ONE-PIECE TOILET

W 372 / D 809 / H 605 mm

- AQUA CERAMIC prevents dirt from sticking
- Sleek and simple overall design with seat and cover easy to clean
- Water-saving dual flushing system, 5.0L / 3.5L
- Double vortex flush
- Soft close seat and seat cover

ONE-PIECE TOILET + ELECTRONIC BIDET
